

AMENDMENTS TO THE SPECIFICATION

Please replace the entire Abstract paragraph beginning at page 12, with the following rewritten Abstract:

-- SPOKED WHEEL SPINNER WITH NON-ROTATING CAP**ABSTRACT OF THE DISCLOSURE**

A spoked wheel spinner (20) ~~is taught for use that is used~~ on an automotive wheel (22). ~~The spoked wheel spinner (20) consists of~~ that includes an adapter plate (24) that is mounted onto the automotive wheel (22) with a spinner bearing (26) retained within ~~said~~ the adapter plate. A spinner shaft (30) is positioned onto the bearing with a bladed spinner (38) attached onto the spinner shaft. This arrangement permits the bladed spinner (38) to freely rotate independent of the automotive wheel. A cap bearing (50) is located on the spinner shaft (30) with a non-rotating cap (52) interfacing with the cap bearing. The non-rotating cap (52) includes a counter-weight (60) on the bottom edge so that when the automotive wheel (22) is rotating, the cap remains in a relatively fixed position without rotating. A cover (64) having indicia is attached to the cap permitting writing, symbols, designs and the like to be displayed.--
